

Winning through Options

About the Programme:

To start trading in Options, you need to learn the terminologies that are associated with the Options market. This course will teach you how to build your own Options Strategy with sophisticated approaches to preserve and build capital. The leverage and volatility of Options Trading can create dramatic results with small amounts, and our tutorial will enable you to do this. You will be taught how to practice the requisite skills to identify, assess and execute trading opportunities in options in order to create, manage and evolve various strategies and produce consistent profits from Options Trading.

Objective of Programme:

To understand the versatility and profit potential of options trading, which is nearly unmatched in the stock market arena. With this training in Option Trading Strategies, you will be able to make money regardless of the direction of the stock market.

Suitable for:

Traders who wish to enhance their knowledge on derivative trading, and individuals who already have basic knowledge of derivatives and wish to fine-tune their derivative trading skills.
