## Macroeconomic and capex led tailwinds ahead...

**About the stock:** Established in 1984 by first generation technocrat Mr Rajendra Gogri, Aarti Industries is a leading speciality chemicals company.

- The company operates in key value chains such as Nitro Chloro Benzene, Dichloro Benzene, Phenylenediamines, Nitro Toluene among others. The company caters to end use industries such as Energy (octane booster), Agrochem, Dyes, Pharma, Polymers among others. x
- The company has incurred a significant capex (~₹ 8000 crore) over the last 6-7 years to expand product offerings and derisking. Its aspirational EBITDA range is ₹1,800–2,200 crore by FY28 EBITDA.

### Result Performance & Investment Rationale

- Q3FY26- Strong revenues growth boosted by Energy Business-** Revenues stood at ₹2,318 crore, up 26% YoY on the back of Energy business (51% of the revenues) which reported a growth of 83% YoY, while the rest of the segments such as Agrochem, Dyes, Pharma and Polymer reported a muted growth. GPM for the quarter stood at 32%, up ~200 bps YoY. EBITDA for the quarter came at ₹326 crore, up 39% YoY, translating to EBITDA Margins of 13%, up ~160 bps YoY.
- Capex to boost growth ahead; FY28 Guidance maintained-** The management has reaffirmed its FY28 EBITDA Guidance of ₹1,800-₹2200 supported by Debt/ EBITDA of <2.5x and ROCE of >15%, driven by ongoing cost optimization, ramp up of existing capacities and phased commissioning of multipurpose plants and downstream blocks in Zone-IV. The company has revised its FY26 capex upward to ~₹1,100 crore (from initial ₹1,000 crore) primarily to fund Zone-IV development, MMA capacity expansion to 360 KT, and PDCB debottlenecking, with the bulk of investments completing this year—leading to significantly lower capex in FY27. The newly commissioned Zone IV facility has five blocks- one for calcium chloride another is multipurpose plant (MPP) and the remaining three are earmarked for different chemistries. The management has put significant impetus on zone IV for a transformational growth.
- Macroeconomic tailwinds accelerating recovery-** The management expects three significant global tailwinds for growth- 1) US trade deal, wherein the tariffs are reduced from the highs of 50% to ~18% now. 2) EU-India FTA. 3) China's anti-involution drive. The US trade deal is expected to increase volumes in MMA and PDCB, along with margin improvement. EU FTA is likely to help the company to expand in Europe. China anti-involution drive is expected to improve pharmaceutical/agrochemicals' margins, which are witnessing pressure from Chinese dumping.

### Rating and Target Price

- Our Target is ₹515 based on 12x FY28 EBITDA of ₹1,806 crore. We believe the risk-reward scenario is favourable given the improving macros and growth capex.

## Q3FY26 Earnings Release / Conference call highlights

### Key Highlights

- The energy business (MMA) remains the primary growth engine with robust volumes. On the other hand, Agrochemicals and pharmaceuticals saw pricing pressure.
- MMA experienced full tariff applicability in Q3FY26, where the US exports accounts for 50-60%. PDCB accounts for 15-20% of the US exports. Accordingly, the India- US trade deal which reduces the tariffs from (50%+ to ~18%) is expected to drive better realisations and volume recovery for products like PDA, MMA, PDCB and NCB.
- The management highlighted that MMA is likely to settle at 30-40% of the total portfolio over the next 2-3 years
- The company diversified its export mix towards the US, Europe, Middle East, Africa, and other select countries, which helped sustain and grow volumes while managing risk.
- The company provided for a one-time impact of ₹15 crore due to the implementation of a new labour code, recorded as an exceptional expense for the period.
- The upcoming Zone 4 capacity will see the commissioning of upcoming MPP, chlorotoluene, and calcium chloride blocks in a phased manner during the current calendar year, utilizing in-house technology.
- Exports share stood at 65%.

### M&A

- Company's two joint ventures with the Superform JV (focused on paints and coatings) expected to commission in Q1 FY'27, and the RESL JV's first manufacturing unit anticipated for commissioning in H1 FY'27.
- The JV with an investment of ₹150 crore from each party has a revenue potential of ₹ 300 crore.  
In Q2FY26, the company has also signed long term supply agreement with DCM Chloro- Alkali to procure consistent supply of, Chlorine, its key raw material.

### Capex Plans:

- The estimated CapEx for FY '26 is approximately ₹1,100 crore, a slight increase from the previously guided ₹1,000 crore, driven by fast-track expansion initiatives for Zone IV.
- CapEx for FY '27 is projected to be significantly lower, as the Zone-4 project is scheduled for commercialization in calendar year '26, with no other large projects currently in the pipeline.
- The total CapEx for Zone IV is estimated between ₹ 1,600 crore and ₹ 1,800 crore, with the majority deployed by the end of the current fiscal year, leaving only ₹ 300 crore to ₹ 400 crore for the next year.

### Guidance:

- The company has provided medium term EBITDA guidance of achieving ₹1,800-₹2,200 crore by FY28 from the FY25 levels of ₹1,016 crore. With a Debt/ EBITDA of <2.5x and ROCE of >15%.
- Management believes the 14%-15% EBITDA margin range is sustainable for non-energy applications, with an expectation for improvement going forward due to the three macro factors discussed.

## RATING RATIONALE

ICICI Direct endeavours to provide objective opinions and recommendations. ICICI Direct assigns ratings to its stocks according to their notional target price vs. current market price and then categorizes them as Buy, Hold, Reduce and Sell. The performance horizon is two years unless specified and the notional target price is defined as the analysts' valuation for a stock

Buy: >15%

Hold: -5% to 15%;

Reduce: -15% to -5%;

Sell: <-15%
