

Challenging times, expensive valuations...

Timken India reported subdued Q2FY21 numbers that were broadly in line with our estimates. Revenue for the quarter came in at ₹ 392.23 crore, down 2.2% YoY (vs. I-direct estimate of ₹ 400 crore). Slower recovery in CV & other industrial sectors impacted Timken's performance compared to peers. Gross margins contracted ~190 bps YoY. EBIDTA margin was at 21.1% vs. 22.4% YoY. However, it is important to note that Timken posted one of its highest margins in Q2FY20. Absolute EBIDTA came in at ₹ 82.7 crore, down 7.8% YoY (I-direct estimate of ₹ 89.5 crore). Employee cost declined 2.9% YoY to ₹ 30.3 crore. Other expenses declined 5.6% to ₹ 64.2 crore. Tracking its operating performance, Timken ended the quarter with a PAT of ₹ 49.9 crore. Other income came in at ₹ 2.2 crore, diving 65% YoY. Other income declined on account of reduced cash balance, which was used to pay out dividend in June at ₹ 50 per share. Timken generated CFO of ₹ 101.3 crore during H1FY21 vs. ₹ 168.3 crore in H1FY20.

Tractor, wind segment witnessing traction, CV lags...

While CV continued to lag on account of weak demand, the fort was held by steady traction in the wind & tractor segment. Exports contribution in the Q2FY21 revenue mix fell 2% YoY to 26% vs. 28% in Q2FY20. Nonetheless, the management expects strong offtake on the exports front on the back of a solid order book and new product exports from ABC plant. Furthermore, Timken expects to launch new products in areas like solar, belts, drives and lubricants in order to improve market share and utilisation.

Railways to sustain steady growth...

Conversion of conventional coaches to LHB coaches, upcoming metro projects and DFC corridor to make up an annual market of ₹ 1500-1800 crore for Timken. We believe Timken's expertise in tapered roller bearing would play a crucial role and provide it with a sustainable growth path in the railway segment, albeit at a moderate pace. Share of railways in revenue mix came down to 26% in Q2FY21 from 28% in Q2FY20.

Valuation & Outlook

Amid a challenging environment, Timken has managed to sustain its operating margins albeit on a lower topline. MNC status, debt free balance sheet & high return ratios bode well for the company amid uncertain times. However, the recent run up in Timken's stock price has made valuations too expensive for our comfort. Thus, taking into consideration all the above factors, we roll over and introduce FY23E. We pencil in revenue, EBIDTA and PAT CAGR of 5%, 5% & 2.6%, respectively, in FY20E-23E. We value Timken at 35x FY23EPS to arrive at a target price of ₹ 1235/share. We revise our rating on the stock from BUY to HOLD.
